#### SECTION 4: FIRST AID MEASURES

- Inhalation:** Move to fresh air. If breathing is difficult, give oxygen. If breathing stops, provide artificial respiration. Get medical attention if symptoms persist.
- Skin contact:** Wash off with plenty of water. Duration of rinsing should be at least 15 minutes. Get medical attention if irritation develops and persists.
- Eye contact:** Flush with large amounts of water for 15 minutes. Get medical attention if irritation persists after washing.
- Ingestion:** Do not induce vomiting. Never give anything by mouth to a victim who is unconscious or is having convulsions. Get medical attention if any discomfort continues.
- Most important symptoms/effects, acute and delayed:** May be mildly irritating to the skin and eyes. Symptoms may include redness, edema, drying, defatting and cracking of the skin. Symptoms may include stinging and tearing. May cause respiratory irritation. Symptoms may include upper respiratory irritation, coughing, and breathing difficulties. Ingestion may cause gastrointestinal irritation, nausea, vomiting and diarrhea.
- Indication of immediate medical attention and special treatment needed:** Treat symptomatically.
- General information:** Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

#### SECTION 5: FIRE FIGHTING MEASURES

- Suitable extinguishing media:** Water fog. Foam. Dry chemical powder. Carbon dioxide (CO<sub>2</sub>).
- Unsuitable extinguishing media:** Do not use water jet as an extinguisher, as this will spread the fire.
- Specific hazards arising from the chemical:** During fire, gases hazardous to health may be formed.
- Special protective equipment and precautions for firefighters:** Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
- Firefighting equipment/instructions:** Firefighters should wear full protective gear. Remove all sources of ignition. Use water spray to cool unopened containers. Move containers from fire area if you can do so without risk. Prevent fire extinguishing water from contaminating surface water or the ground water system.
- Specific methods:** Use standard firefighting procedures and consider the hazards of other involved materials.
- General fire hazards:** No unusual fire or explosion hazards noted.
- Hazardous combustion products:** Carbon oxides. Hydrocarbons.

#### SECTION 6: ACCIDENTAL RELEASE MEASURES

- Personal precautions, protective equipment and emergency procedures:** Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. For personal protection, see section 8 of the SDS.
- Methods and materials for containment and cleaning up:** Extinguish all flames in the vicinity. Stop the flow of material, if this is without risk. Use a non-combustible material like vermiculite, sand or earth to soak up the product and place into a container for later disposal. Contaminated absorbent material may pose the same hazards as the spilled product. Prevent entry into waterways, sewer, basements or confined areas. Following product recovery, flush area with water. Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS. In the event of a spill or accidental release, notify relevant authorities in accordance with all applicable regulations.
- Environmental precautions:** Avoid discharge into drains, water courses or onto the ground.

#### SECTION 7: HANDLING AND STORAGE

- Precautions for safe handling:** Eliminate all sources of ignition. Avoid breathing mist or vapor. Avoid contact with eyes, skin, and clothing. When using, do not eat, drink or smoke. Should be handled in closed systems, if possible. Do not use in areas without adequate

ventilation. Wear appropriate personal protective equipment. Wash hands thoroughly after handling. Observe good industrial hygiene practices.

**Conditions for safe storage, including any incompatibilities:** Keep away from heat, sparks and open flame. Store in original tightly closed container. Store in a well-ventilated place. Store in a cool, dry place out of direct sunlight. Store away from incompatible materials (see Section 10 of the SDS).

**Occupational exposure limits**

**U.S. - OSHA**

Components	Type	Value	Form
Zinc, Dithiophosphate	Di-c1-14-alkyl Esters (CAS68649-42-3)	TWA	None

**Appropriate engineering controls:** Ensure adequate ventilation, especially in confined areas. Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.

**Biological limit values:** No biological exposure limits noted for the ingredient(s).

**SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION**

**Individual protection measures, such as personal protective equipment**

**Eye/face protection:** Where contact is likely, safety glasses with side shields are recommended. Eye wash fountain and emergency showers are recommended.

**Hand protection:** Wear appropriate chemical resistant gloves. Advice should be sought from glove suppliers.

**Skin protection:** Wear suitable protective clothing.

**Respiratory protection:** Use a NIOSH/MSHA approved respirator if there is a risk of exposure to dust/fume at levels exceeding the exposure limits. Advice should be sought from respiratory protection specialists.

**Thermal hazards:** Wear appropriate thermal protective clothing, when necessary.

**General hygiene considerations:** Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.
